

Dive Physicals

Physicals for scientific diving require extensive testing and two separate appointments at our Main Campus SHS. Pricing for the various tests and labs varies; please inquire about specific pricing prior to your appointment.

If you are in need of a diving physical, you will have two appointments to complete your dive requirements.

Appointment #1 with the Rapid Care Nurse (approximately 1 hour):

- Please bring your completed health history form
- Vital signs, height and weight will be obtained
- Lab work will be performed: urinalysis, complete blood count (CBC)
- Chest x-ray will be obtained
- Spirometry (pulmonary function testing) will be performed
- Tetanus update will be given if needed
- Complete vision screen and audiogram will be performed

Appointment #2 with a physician (approximately a week after all testing is complete):

- Provider will review all test reports and recommend clearance or deny clearance for diving

To schedule a dive physical, call (252) 328-6841.
