Quarantine Information

Anyone who has been in close contact with someone who has COVID-19 needs to take steps to quarantine themselves to protect others.

What counts as close contact?

- You were within 6 feet of someone who has COVID-19 for at least 15 minutes cumulatively over a 24 hour period
- You provided care at home to someone who is sick with COVID-19
- You shared eating or drinking utensils
- They sneezed, coughed, or somehow got respiratory droplets on you

Quarantine is used to keep someone who might have been exposed to COVID-19 away from others. Quarantine helps prevent spread of disease that can occur before a person knows they are sick or if they are infected with the virus without feeling symptoms. People in quarantine should stay home, separate themselves from others, monitor their health, and follow directions from their state or local health department. Quarantine differs from isolation:

- Quarantine keeps someone who might have been exposed to the virus away from others.
- Isolation separates people who are infected with the virus away from people who are not infected.

Do’s and Don’ts

- Do not attend in person class or any in person campus event.*
- Please refrain from posting about your exposure on social media, as posting may insight panic.
- Do inform Campus Living if you live on campus and you are quarantined due to an exposure.*
- Do complete the COVID Self Report in Pirate Port
  - This will alert your faculty that are unable to attend class due to quarantine.
  - This report also goes to ECU SHS and Dean of Students office, in order to provide campus resources to you.
  - Scan QR for a quick link to PiratePort.

*It is a code of conduct violation for you to attend any in person class or campus event or to remain in your regular Campus Living housing assignment while you are in isolation or quarantine.

Tracking

- If you have notified ECU SHS that you are in quarantine, you should expect to be contacted by regularly to monitor your symptoms and assist you as needed.
- You may also be contacted by the local health department to discuss your exposure.
- You may also receive a call from the Dean of Students office to assist you with resources.

Ending Quarantine

The timeframe for ending quarantine depends on your exposure situation, whether you were tested, and information regarding your health history. ECU SHS can help you determine when you have met the criteria for ending quarantine and resuming regular activities. As always, when quarantine is over, it is still recommended that you follow good prevention practices such as social distancing, wearing a mask/face covering when in public, frequent hand washing, and limiting public/crowded areas.

Worried about an exposure?

- Review the attached information to assess your risk.
- If after reviewing this you feel you have had an exposure, or if you have any questions or concerns, please contact ECU Student Health Services at (252) 328-6841 or email gotquestions@ecu.edu.
- ECU Student Health Services is open M-F from 8-5. If you have an exposure after hours, please quarantine and contact our office the next business day. As always, you can contact our free, after hours nurse line by calling 252-328-6841.

Testing Information

ECU SHS performs a nasopharyngeal swab test for COVID-19 infection by appointment. It is not painful but can be an uncomfortable sensation that makes your eyes water or elicits a cough. Testing charges will be filed to private insurance first if we have your insurance information on file. We file most insurances—we currently cannot file government sponsored insurances and some Medishare Plans. Any balance unpaid by insurance will be charged to a student’s cashier account. Results will be sent to you securely through your myPIRATEchart account. If testing is recommended for you following an exposure, an appointment can be scheduled with ECU Student Health Services.

Examples of social, academic, and clinical exposures:

<table>
<thead>
<tr>
<th>COVID-19 + person (friend, patient, classmate, etc):</th>
<th></th>
</tr>
</thead>
</table>
| √ Mask/face covering  
OR  
× No mask/ no face covering | • No quarantine or extra precautions needed  
• No missed class or work time  
• Continue good practices of social distancing, wearing a mask/face covering, frequent hand washing  
• Continue to wear applicable PPE if in clinical settings |
| You:  
√ Mask  
AND  
√ Face shield |  |
|  |  |
| COVID-19 + person (friend, patient, classmate, etc): |  |
| √ Mask/face covering | • No quarantine or extra precautions needed  
• No missed class or work time  
• Continue good practices of social distancing, wearing a mask/face covering, frequent hand washing  
• Continue to wear applicable PPE if in clinical settings |
| You:  
√ Mask/face covering |  |
|  |  |
| COVID-19 + person (friend, patient, classmate, etc): |  |
| × No mask/face covering | • If you had close contact with that person, stay home and quarantine  
• Notify ECU Student Health Services at (252) 328-6841 during business hours  
• Watch for fever (100.4°F), cough, shortness of breath, or other symptoms of COVID-19  
• Testing may be advised on quarantine day 6; if negative, your health care provider may release you early from quarantine  
• If no testing is done, your last day of quarantine is 14 days from the date you had contact with that patient |
| You:  
√ Mask/face covering |  |

All information is based on current CDC guidelines, which are subject to change.  
Examples of household exposures:

| I live with someone who has COVID-19 (e.g., roommate, partner, family member), and that person has isolated by staying in a separate bedroom. I have had no close contact with the person since they isolated. | • Stay home and quarantine  
• Notify ECU Student Health Services at (252) 328-6841 during business hours  
• Watch for fever (100.4°F), cough, shortness of breath, or other symptoms of COVID-19  
• Testing may be advised on quarantine day 6; if negative, your health care provider may release you early from quarantine  
• If no testing is done, your last day of quarantine is 14 days from when the person with COVID-19 began home isolation. |
|---|---|
| I live with someone who has COVID-19 and started my 14-day quarantine period because we had close contact, but now we’ve had close contact again or another member of the house is sick. | • Stay home and quarantine  
• Notify ECU Student Health Services at (252) 328-6841 during business hours  
• Watch for fever (100.4°F), cough, shortness of breath, or other symptoms of COVID-19  
• Testing may be advised on quarantine day 6; if negative, your health care provider may release you early from quarantine  
• You will have to restart your quarantine from the last day you had close contact with anyone in your house who has COVID-19. Any time a new household member gets sick with COVID-19 and you had close contact, you will need to restart your quarantine. If no testing is done, your last day of quarantine would be 14 days from any close contact with any COVID-19 infected persons in your house. |
| I live in a household where I cannot avoid close contact with the person who has COVID-19. I am providing direct care to the person who is sick, don’t have a separate bedroom to isolate the person who is sick, or live in close quarters where I am unable to keep a physical distance of 6 feet. | • Stay home and quarantine  
• Notify ECU Student Health Services at (252) 328-6841 during business hours  
• Watch for fever (100.4°F), cough, shortness of breath, or other symptoms of COVID-19  
• Testing may be advised on day 6 after the COVID-19 infected person you are caring for is released from home isolation. If no testing is done, your last day of quarantine would be 14 days when the COVID-19 infected person was released from home isolation by their health care provider. |
